

## METLIFE EXECUTIVES WORK WITH HABITAT TO REBUILD HOMES IN NEPAL

*Panchkhal community gets support from earthquake assistance program*

**Kathmandu, June 16, 2017** – Executives from MetLife’s Asia Regional Operations volunteered with Habitat for Humanity Nepal to help re-build an earthquake-affected community in Panchkhal, Kavre.

The team of regional executives, led by Mr. Boon Choo, Senior Vice President - Asia Operations, experienced Habitat Nepal’s earthquake assistance program on the ground and their day of service allowed them to interact with the community, work side by side with families, listen to their stories and learn about the country and its communities by seeing how things work in practice.

A total of 21 volunteers from Japan, South Korea, China, Australia, Hong Kong, Malaysia, India, Bangladesh and USA who were in Nepal for a 3 day visit, participated in the activity.

MetLife Foundation has been working closely with Habitat for Humanity Projects in various countries in Asia. Around 100 employees from MetLife Nepal also volunteered with Habitat to support housebuilding activities in an earthquake affected community in Kavre last year.
